Preparation Instructions

FOR COCKROACHES OR SILVERFISH:

1. Remove EVERYTHING from all kitchen and bathroom cabinets, drawers, and counters. Do not forget to empty the medicine cabinet.
2. If you prefer, items may be left in the drawers BUT the drawers should be removed entirely from the cabinets with contents intact. Dresser drawers should be removed and placed on the bed.
3. Place all kitchen items on a table or floor, OUT OF THE KITCHEN, and cover with a sheet. Any washing of cabinets should be done BEFORE SPRAYING!
4. Remove all loose paper. Adhesive shelf paper may be left in place.
5. Remove all items from linen closets, hall closets, etc. and place in center of room.
6. Remove all items from bedroom closet floors and shelves. Clothing on hangers may be left in place if you simply pull it to the center of the rack and cover with a sheet of plastic. We recommend simply lifting the clothing off the rack and laying it on the bed.
7. Move all furniture 2-3 feet from the walls.
8. Remove all animals, birds, and fish. If your fish tank is too heavy to move outside, then place wet towels over the top of the tank and disconnect the air pump for 4-6 hours, also wrap the air

pump in plastic. (It is recommended to check with your fish dealer on any breeds, which might suffer from a 6-hour lack of aeration, such breeds must be removed from the premises. NOTE: Do not disconnect the HEAT PUMPS! Only air pumps!

9. Windows may be left open (unless otherwise advised).

10. Leave your home for 4 hours. If odor is offensive, ventilate thoroughly and leave for an additional 2 hours.

12. When you come home, be sure that the chemical is COMPLETELY DRY before returning your items to the cabinets and closets. DO NOT WASH THE CABINETS, as this will destroy the effectiveness of the chemical. DO NOT be alarmed if you see insects after spraying. These will decrease as the chemical takes effect. Conditions should be "all clear" in 14-21 days.

FOR WATERBUGS, ANTS, CRICKETS, EARWIGS:

1. Remove EVERYTHING from all lower kitchen and bathroom cabinets, drawers, and counters.

2. If you prefer, items may be left in the drawers BUT the drawers should be removed entirely from the cabinets with contents intact. Dresser drawers should be removed and placed on the bed.

3. Place all kitchen items on a table or floor, OUT OF THE KITCHEN, and cover with a sheet. Any washing of cabinets should be done BEFORE SPRAYING!

4. Remove all loose paper. Adhesive shelf paper may be left in place.

DO NOT WASH THE CABINETS, as this will destroy the effectiveness of the chemical. DO NOT be alarmed if you see insects after spraying. These will decrease as the chemical takes effect. Conditions should be "all clear" in 14-21 days.

FOR FLEAS AND TICKS:

Simply remove everything from all floors and carpets (toys, shoes, pillows, magazines, racks, plants, stereo speakers, etc.), except your furniture. Vacuum extra heavily before service, then remove and dispose vacuum bag in trash facility. Closet floors should also be empty. Stay out for 6 hours after service.
